Unraveling Cognitive Aging: A Comprehensive Narrative Review Integrating Six Decades of the Seattle Longitudinal Study with Contemporary Advances

Published On: July 31, 2025 | Pages: 006 - 019

Author(s): Chak Hang Chan*

Cognitive aging research has long been shaped by the Seattle Longitudinal Study (SLS), a six-decade investigation into age-related cognitive changes. This narrative review synthesizes SLS findings, emphasizing its five core objectives: elucidating patterns of cognitive decline, identifying onset ages, characterizing individual differences, determining determinants of ...

Are Future Occupational Therapists Sufficiently Prepared to Take Care of Older Adults? Prevalence of Negative Age Stereotypes in Occupational Therapy Undergraduate Students: A Cross-sectional Study

Published On: April 01, 2025 | Pages: 001 - 005

Author(s): Jorge Leocadio-Baño, Ariadna de la Vega-Castelo*, Carlos Vara-García, Rosa Romero-Moreno and María del Sequeros Pedroso-Chaparro

With the population aging, it is necessary to train future healthcare professionals to properly care for the growing number of older adults. One challenge is that age stereotypes are commonly found among healthcare professionals, making it difficult to adequately care for this population. Even so, age stereotypes among occupational therapy undergraduate students are r ...
