Concerning the relationship between noise on board ship and the onset of hypertension in seafarers

Published On: January 07, 2021 | Pages: 001 - 002

Author(s): Dominique Jégaden*

Establishing a causal relationship between noise level and the onset of high blood pressure is a controversial topic which has been debated for over forty years. This question may seem to some to be secondary, even insignificant, but the considerable number of studies on this issue confirm that is a public health problem that should not be overlooked. Indeed, noise is ...

Risk assessment of corona virus: Implementing hierarchy of hazard control in workplaces

Published On: March 02, 2021 | Pages: 003 - 006

Author(s): Fatma Demircan Yildirim and Ismail Ekmekci*

The novel coronavirus or the other name Severe Acute Respiratory Syndrome coronavirus-2 (SARS-CoV-2), was first identified in Wuhan, China, in December 2019 among a group of patients that have the same symtoms of viral pneumonia. Due to the socio-economic factors in Zhuhai, Wuhan and globalization have also accelerated the spread of infectious diseases to the other pa ...
