Survey on the Prevalence of Buruli Ulcer in Patients with Chronic Wounds in Pointe-Noire

Published On: November 14, 2024 | Pages: 017 - 022

Author(s): Freddy Saturnin Pouki*, Aubierge Victoire Kimpamboudi Matondo, Parode Ragive Takale, Constant Biocat, Rodiano Tcibinda, Siméon Nama, Steven Moukalath, Axelle Paquet, Jery Steve Ferole Boungou and Luc Magloire Anicet Boumba

Background & objective: Buruli Ulcer (BU) is a human skin infection caused by Mycobacterium ulcerans, an environmental mycobacterium. This pathology is most prevalent in humid tropical regions, particularly near swampy or flood-prone areas. In Pointe-Noire, a coastal city in the Republic of Congo, Buruli ulcer is a health threat requiring ongoing surveillance and awar ...

Parasitological Consequences Followed Dysentery Infections in Mesopotamia

Published On: August 13, 2024 | Pages: 012 - 016

Author(s): Mays Kadhim Oleiwi and Samadov Aabdic*

When compared to the opposing addresses in this research report, the present investigation revealed significant data ($p < 0.05$) about dysenteric infection rates in male patients, elderly patients, and rural places. Additionally, the infections with dysenteric agents were demonstrated using GSE and deoxycholate citrate agar media. The hypothesis is positioned beneat ...

A “Rearview Mirror” Look at COVID-19: Successes and Further Lessons at Botswana Open University

Published On: July 23, 2024 | Pages: 001 - 006

Author(s): Sunny Aiyuk*, Montlenyane Madisa, Bonny Bashe, Tendani Nkolo, Uyapo Mooketsi and Kealeboga Disho

In retrospect, as if looking into a rearview mirror, the COVID-19 pandemic came with a lot of challenges to business processes, where workplaces had to reinvent themselves to remain afloat. This has been particularly the case with universities, where embracing online teaching and learning was precipitated, usually without enough know-how in ODL. The Botswana Open Univ ...
