Post-vaccinal reactions following vaccination with the COVID-19 vaccine after first and second dose

Published On: March 05, 2024 | Pages: 006 - 010

Author(s): Velina Stoeva*, Rosen Mihaylov, Blagovesta Pencheva and Antoineta Mihova

Among the countries in the European Union, Bulgaria reports the lowest immunization coverage. Gathering reliable information on the level of post-vaccine adverse events and making it publicly available might increase public confidence in vaccines and immunization strategies. The aim of our study is to analyze and summarize post-vaccination reactions among 100 pre-hosp ...

Considerations for improving future pandemic responses

Published On: February 08, 2024 | Pages: 001 - 005

Author(s): Mikolaj Raszek*, David Cowley and Alberto Rubio-Casillas

The COVID-19 pandemic of 2020 shook the world with its unprecedented scale, affecting over 700 million people and causing nearly 7 million deaths globally. In response, rapid and extraordinary measures were taken, including the development and distribution of COVID-19 vaccines at an unprecedented pace. However, the speed and magnitude of the response have raised quest ...
