Lessons from COVID-19: Overcoming Vaccine Hesitancy for the Malaria Vaccine in Africa

Published On: June 13, 2025 | Pages: 001 - 003

Author(s): Audry Marorerwa*, Guy Tresor Karikera and Egide Haragirimana

Vaccines have played a key role in battling infectious diseases, sparing countless lives from death. From smallpox eradication to COVID-19 control recently, vaccines have shown their efficacy in protecting populations. However, despite these successes, vaccination programs continue to face significant challenges, including vaccine hesitancy [1]. ...
