## Managing Pediatric Syncope in Primary Healthcare Settings

Published On: April 22, 2025 | Pages: 001 - 006

Author(s): K Suresh\*

Temporary Loss of Consciousness (TLOC) commonly known as Fainting or Syncope is a heterogeneous syndrome with complex underlying mechanisms, with a broad spectrum of presentation, even in pediatric clinics in Developing countries including India. The objective of this article is to emphasize the importance of early diagnosis and structured follow-up in resource limited ...

## Preliminary Validation and Standardization of a New Test Battery for the Assessment of Motor Intelligence in Childhood

Published On: December 05, 2025 | Pages: 007 - 010

Author(s): Mirko Zisi\*

Background: Motor intelligence encompasses locomotor abilities, object-control skills, visuomotor coordination, and executive components of movement planning. Although several international instruments exist, such as the TGMD, BOT-2, and MABC-2, no standardized, simple, and culturally adapted tool is currently available for the Italian context. In this preliminary study ...
