Managing Pediatric Syncope in Primary Healthcare Settings

Published On: April 22, 2025 | Pages: 001 - 006

Author(s): K Suresh*

Temporary Loss of Consciousness (TLOC) commonly known as Fainting or Syncope is a heterogeneous syndrome with complex underlying mechanisms, with a broad spectrum of presentation, even in pediatric clinics in Developing countries including India. The objective of this article is to emphasize the importance of early diagnosis and structured follow-up in resource limite ...
