Cross-sectional observational study on correlation of obesity and overweight in children with insulin resistance based on HOMA-IR score

Published On: September 26, 2023 | Pages: 039 - 044

Author(s): Clara Rilna Joseph*, Harish Kumar and Kavitha Bhat

With improvements in lifestyle and healthcare throughout the world, there has been an increasing incidence of obesity among adults and children. It is important that obesity and its adverse effects be recognized in childhood and measures be taken right from childhood to tackle the long-term outcomes of the same. We have studied the correlation of scores like Homeostas ...

The complex sexuality of "Italian" Hikikomori and the need for better

nosographic framing of psychopathological evidence

Published On: June 21, 2023 | Pages: 024 - 032

Author(s): Giulio Perrotta* and Domenico Piccininno

Objective: The definition of “hikikomori” evokes dysfunctional personality pictures already known in the literature and medical practice. The aim is to refute the hypothesis of the need to identify this clinical condition in a new descriptive framework. Materials and methods: Pubmed checklist, clinical interview, and psychometric tests. Results: In the entirety of ...

The impact of the COVID-19 pandemic on parents seeking dental care for their children

Published On: June 13, 2023 | Pages: 015 - 023

Author(s): Sara Toema*, Chukwuebuka Ogwo, Nikita Patel, Cailleigh Fritz, Alexandria Catalano, Angelica Saclayan and Salwa Mekled*

Many changes in routine dental care were implemented to protect dentists and patients during the COVID-19 pandemic. Pediatric dentists face unique challenges in dealing with parental fears and behavioral changes in pediatric patients. Despite the meticulous infection control protocols that dental offices have implemented during the pandemic, they experienced significa ...

The psychopathological evolution of “Behavior and Conduct Disorder in Childhood”: Deviant and criminal traits in preadolescence and adolescence. A review

Published On: October 31, 2023 | Pages: 045 - 059

Author(s): Giulio Perrotta*, Gianfranco Fabiano and Federica Posta

Starting from the general concept of “Behavior and Conduct Disorder in Childhood”, the present review seeks to highlight

the main predictive elements that, in preadolescent and adolescent age, can correlate with the symptomatological picture of distinctive disorders in deviant and criminal conduct. Early educational intervention, prevention in all its forms and the us ...

Strengthened primary health care for universal health coverage through improved community diagnosis and management of pneumonia in Zimbabwe

Published On: March 15, 2023 | Pages: 003 - 006

Author(s): Portia Manangazira*, Itai Rusike, Mandy Mathias, Tjedu Moyo, Moreblessing Chibaya and Joshua Panashe Rusike

Pneumonia is the world's leading infectious killer, claiming the lives of an estimated 2.5 million including more than 670,000 children under five years and 1.2 million adults in 2019 alone. Caused largely by viruses, and bacteria, COVID-19 also increased the pneumonia burden, while environmental factors, poor hygiene, sanitation and underlying conditions including ma ...
